THE
EFFECTIVENESS
OF ITS FORMULA
IT SLOWS DOWN SKIN AGEING

PURE VITAMIN C + VITAMIN C DERIVATIVE (VC-IP)

Our Pure Vitamin C (Ascorbic Acid) makes for its high antioxidant power thanks to the stability of its formula, since it remains encapsulated and insulated from the serum to preserve maximum effectiveness when used.

In turn, Vitamin C Derivative (VC-IP) decomposes in the form of Pure Vitamin C with all its benefits when absorbed.

Both play a crucial role in the synthesis of collagen making it possible to restore the skin's firmness and suppleness.

PATENTED HLG NANOPOLYMER

Multiplies x 6 the effectiveness of Pure Vitamin C*.

With a high hydrating and nourishing power and made up of Hyaluronic Acid, Lysine and Glutamic Acid, this compound nourishes skin cells and allows a sustained release of the active ingredients, thus undertaking an overall anti-ageing action.

*Clinically proven efficacy.

VITAMIN E + FERULIC ACID

The synergy between these excellent antioxidants offers astonishing benefits: they illuminate and even the skin tone, neutralise the damage caused by free radicals and help delay the effects of ageing.

All products have been dermatologist-tested.
